

TA Cloud Print and Scan

The secure cloud solution for printing and scanning from any location

TA Cloud Print and Scan from TA Triumph-Adler is a cloud solution that makes it possible for small and medium-sized businesses to print and scan from any location. This is a clear and indispensable advantage in everyday working life, which is becoming increasingly characterised by working from home and mobile working. The application is browser-based and intuitive to use, and also meets the highest security standards.

Whether you are looking for secure printing from any location or scanning to the cloud without a local server, the cloud-based print and scan management tool **TA Cloud Print and Scan** makes things simple, secure and cost-effective. It doesn't require any complex installation: simply sign up and start enjoying the many benefits of this innovative cloud solution right away.

The possibilities provided by TA Cloud Print and Scan:

The benefits of TA Cloud Print and Scan

- **Printing from any location:** Whether you are working from home, in the office or on the road, with TA Cloud Print and Scan you can print and scan **from anywhere** via the cloud.
- **Simple and customised integration**
- **High security** for data and documents by means of user identification using a username and password, PIN, or card login via the card reader directly on the multifunctional system as well as data encryption until printing (Follow2Print)
- Print jobs sent via a PC can be collected at **any multifunctional system**.
- **No expensive hardware investments** thanks to cloud-based setup
- **Save paper** by automatically deleting uncollected print jobs at user-definable intervals
- **Clear tenant separation** through independent and fully isolated instances

Cost-effective and easy to implement: the solution for tomorrow´s printing and scanning!

Key advantages for administrators

- Straightforward **user creation including Entra ID integration** and rights management
- Keep an eye on all processes thanks to **print/scan activity tracking**
- Easy **administration**
- **Job lists and print volumes** are shown and **reports** are generated
- Optional printing via the cloud or – to **minimise data transfer** – via a printer in the local network
- **Terminal server support**

And the key advantages for users

- **Print from any desktop application**
- Easy **scanning directly to the cloud** and – via **Scan2Me** – as a link to the email inbox
- Using **Follow2Print** guarantees the security of all print data
- **List of individual jobs** with preview
- Can be linked to third-party **cloud storage accounts** such as Google Drive, SharePoint, OneDrive / OneDrive for Business, and BOX / BOX Enterprise.

How can the security of the data be guaranteed?

TA Cloud Print and Scan is compliant with the EU General Data Protection Regulation (GDPR). All orders are centrally managed in the cloud and processed in encrypted form. The Follow2Print function only allows printouts to be collected once the employee has identified themselves at the multifunction printer (MFP) using a code card/transponder (optional), username and password, or by using a PIN-login. This prevents printouts from falling into the wrong hands.

SYSTEM REQUIREMENTS FOR THE DESKTOP CLIENT

- **Operating system:** Microsoft Windows 10/11, Microsoft Windows Server 2019/ 2022/2025 (Microsoft Windows operating systems that have reached EOL are not supported)
