

TA Cloud Capture

The solution for cloud-based scanning

Flexibility and mobility are becoming increasingly important in today's business environment. With TA Cloud Capture, we offer you a simple and uncomplicated solution that gives you secure access to your personal cloud storage from any HyPAS™ multifunctional device (MFP).

Scan documents on the multifunction printer and save them directly to the cloud? TA Cloud Capture offers everything you need for **scalable and powerful document capture and processing tool.** The solution combines all the important functions for the **digitalization indexing and storage** of your documents offers **an easy way to implement.**

Your possibilities with TA Cloud Capture:

Discover the following advantages with our smart cloud solution:

- Scan documents directly **into your personal cloud storage.** You can also use our OCR* full-text recognition for the creation of smart digital documents.
- For TA Cloud Capture, you don't need much IT knowledge, no additional hardware and no extensive onboarding. Our solution can be used in combination with our cloud-ready MFPs and **enables location-independent and secure access** to your documents and cloud services.
- Our solution offers **convenient image processing and scanning functions.** These include the Automatic correction of document orientation, multi-crop scan for capturing small-format and non-standardized documents and the automatic creation of file names.
- Create **customized workflows** for capturing, indexing and archiving and utilize the effortless implementation with our HyPAS™ application.
- Our smart solution offers a simple connection of your print jobs and scans to our cloud-based archiving solution TACIM (TA Cloud Information Manager).

More about the functions and benefits

Cost-effective and easy to implement: the solution for location-independent document management
