

## Breite der CTA-Buttons

CTA-Buttons (CallToAction) verfügen über drei konfigurierbare Längen:

- smallSize
- mediumSize
- keine (entspricht fullSize)

The screenshot shows a web editor interface on the left and a live preview of a website on the right. The editor's 'Local Settings' panel is open, displaying a table of properties for the 'Zum Online-Support' button:

Property	Value	Type
smallSize	<input checked="" type="checkbox"/>	Boolean
mediumSize	<input type="checkbox"/>	Boolean
callToActionDisabled	<input type="checkbox"/>	Boolean
callToActionCustomText	Zum Online-Support	String

Annotations on the editor side indicate: 'default / kein Haken' for the 'smallSize' property and 'mediumSize' for the 'mediumSize' property.

The live preview on the right shows a website with several orange CTA buttons of different widths, each with a corresponding label: 'Zum Online-Support' (mediumSize), 'Zur Serviceanfrage' (default / kein Haken), 'Teamviewer Supportmodul' (mediumSize), 'Teamviewer Präsentationsmodul' (mediumSize), and 'Verbrauchsmaterial bestellen' (mediumSize).
