

A Successful Partnership: Document Logistics Provider DOCUsystem and TA Triumph-Adler

DOCUsystem GmbH relies on the TA Pro 15050c inkjet printing system for production printing.

The initial situation

“We at DOCUsystem specialize in document logistics. That means we receive data from our customers, print it out, insert it into envelopes, and hand it over for shipping at the end of the day. Over the course of a year, we handle several million letters in this way,” explains Managing Director Jürgen Scheer, describing the company’s business area. Scheer founded DOCU-system GmbH in 1995, and since then the medium-sized company has enjoyed continuous growth in a highly competitive market. DOCUsystem offers its customers smooth, seamless workflows: via a specially developed app, customers’ print data is transmitted directly to DOCUsystem’s production systems, while the software controls and monitors production through to completion. For many years, the company lacked a production printing system in the digital printing segment that could bridge the gap between high-volume inkjet printing and toner-based cut-sheet machines. “It was very important to us that the new printing machine could be integrated smoothly into our software environment and would work reliably right from the start,” says Scheer. “And it really took a long time before we found such a machine!”

- **Customer since:** 2020

DOCUsystem GmbH is an owner-managed company founded in 1995 with 50 employees, specializing in document logistics in the areas of daily mail processing as well as lettershop and fulfillment services. The company is headquartered in Rödermark, southeast of Frankfurt am Main. From there, it offers its customers tailored solutions ranging from printing and enveloping to shipping. Since 2021, DOCUsystem has relied on TA Triumph-Adler’s high-performance inkjet printing system, the TA Pro 15050c.

The Solution

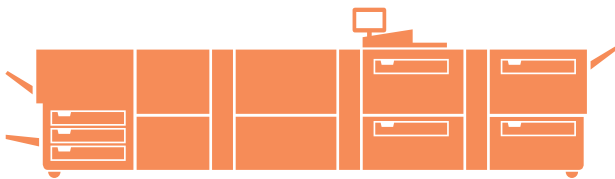

TA Triumph-Adler’s new high-performance inkjet printing system, the TA Pro 15050c, meets DOCUsystem’s expectations. The company put the machine into operation in January 2021. The installation went smoothly. “The machine arrived, has been part of production ever since, and has been earning its keep from day one,” says Scheer. The TA Pro 15050c can produce up to 150 pages per minute – that is 9,000 pages per hour. To ensure that paper does not run out too quickly, the system can be equipped with up to four large trays holding a total of 14,100 sheets. “Thanks to the TA Pro 15050c, we are now able to meet customer requirements that we could not meet before – both in terms of price and quality,” says Scheer. This is also good news for the company’s small and medium-sized customers, whose orders can now be processed even more precisely. “Our customers expect speed and reliability from us. Through our collaboration with TA Triumph-Adler and the use of the TA Pro 15050c, we have become much more flexible in processing our orders – and that pays off every single day.”

The Result

The use of the TA Pro 15050c has enabled DOCUssystem to increase both printing speed and print quality while also benefiting from an excellent price-performance ratio. Scheer also praises TA Triumph-Adler's service quality. **"Although we have hardly needed service so far, whenever there was an issue, a solution was found quickly,"** says the Managing Director. "We are very pleased that we share the same values as TA Triumph-Adler, such as speed and reliability. After this successful start to our partnership, we can well imagine that having just one TA Pro 15050c may soon no longer be enough for us."

The TA Solution at a Glance

The Solution

TA Pro 15050c inkjet printing system

The Result

100 % cost transparency

Time savings and greater efficiency

"Thanks to the TA Pro 15050c, we are now able to meet customer requirements that we could not meet before – both in terms of price and quality."
