Recognise the power of colour!

Colour is valuable: Not only will you impress with the output quality of the printing, scanning – including when on the move via WiFi* – copying and faxing* features of the 2500ci A3 colour multifunctional system. You will also score points with the effective colour reproduction of your documents. Colour makes a good impression, improves your image and attracts attention. In other words, colour increases the value of your documents.

There are significant variations between different industries and their system requirements. You will achieve the best results if you configure your system with the optional hardware and software features to match your individual expectations. You should only be satisfied once everything fits perfectly.

Your benefits:

Simple and clear operation: Click the easy-to-understand, intuitive operation via a colour touch panel, and zoom and swipe as you would on a smartphone or tablet. Click the 'Home' button to return to where you started from.

Flexible paper management: Enhance documents and conveniently complete reports, handouts, etc., with paper capacities of up to 4,100 sheets* and paper weights of up to 256 g/m². The finisher* delivers stapled documents that are ready to be presented and sent.

Increased productivity: The first b/w page is printed after just 6.2 seconds thanks to the short warm-up time. High-speed outputs of up to 25 A4 colour pages per minute, up to 13 A3 colour pages per minute, and an extremely high duplex productivity mean that your documents are available quickly – and deadlines are not missed.

No more typing: The original feeder* (175 sheets and dual scan) ensures the smooth capture and distribution of your scan data in a fully automated manner.

Individualised functions: You can individually integrate needs-based optional software solutions for scanning, productivity and security using the HyPAS interface. Save time and money with solutions for Follow-Me-Printing* within the network or for creating text-searchable documents* when scanning.

Environmentally friendly processing: Reduce energy consumption with the 'Deep Sleep Mode'. Only activate the functions you require. Use less paper: Copy and print double-sided. Protect your environment.
