

P-2540i MFP

Highly quality components mean a high-quality product.

Normally high performance and energy efficiency are features that don't come hand in hand. The P-2540i MFP A3 multifunctional system optimally combines their two seemingly contradictory characteristics. Along with being able to print 25 A4 pages per minute and offering a wide range of standard equipment as well as a number of practical features and expansion options, its environmental footprint is extremely low.

What you can expect:

Intelligent: The P-2540i MFP offers a range of useful features that you will never want to do without again. These include the skip blank pages function and the ID card copy feature which allows you to print both sides of a small-format original document on a single page and save paper in the process. The optional hard drive allows you to create personal user boxes where you can store frequently used documents. This reduces network traffic and saves you precious time at work.

Open: You can naturally use conventional methods to connect the P-2540i MFP to your network. By opting for the optional wireless card, however, you can also use NFC (near-field communication) to establish a connection between the MFP and your mobile device. Or you can use Wi-Fi Direct* to connect up to three mobile devices at any one time.

Discreet: When the 'Private printing' function is used, print jobs with confidential content are only output on the system once a PIN has been entered to ensure your confidential files do not end up in the wrong hands. But an even more convenient option is the integrable card reader* in combination with the Card Authentication Kit*. Any user can quickly and easily log in to the system using a chip card or transponder. This helps protect documents from unauthorised access. All this is possible without the need to enter a password.

Exemplary: The P-2540i MFP is not only user-friendly, it also offers versatile features and is environmentally friendly. The use of ultra-modern components keeps energy consumption low. The MFP also uses long-lasting consumables to make a further valuable contribution to protecting the environment and helping you save money.
