TA

“The speed and level of reliability are really ideal – and the service is great.”

Joint success: TA Triumph-Adler and ETL-Rechtsanwälte

The initial situation

In 2009, lawyer Alexander Streibhardt sought out new technological opportunities to implement his plans for digitising his law firm. TA Triumph-Adler impressed him with solutions that perfectly met his requirements. The goal was to be optimally prepared for the rollout of the special electronic mailbox for lawyers, which was intended to ensure secure login and identity and authorisation checks. “We wanted to shift away from the paper files that defined our everyday work. We sought a software that would allow us to digitise files and easily search for and transfer text passages.”

The solution

TA Triumph-Adler analysed workflows, clarified individual requirements, implemented the TA Fax-Server solution powered by IPTAM and rolled out TA ScanPack for Legal at the law firm. This involved implementing intelligent hardware and the capturing solution linked to the RA-MICRO law firm software in use at the facilities. This was done via a practical HyPAS™ app. Systems were set up at each workplace that can be used for scanning, faxing and printing. Data was recorded centrally through automatic document scanning and direct storage in the digital client mailbox. TA Cockpit®, the Web-based asset management program, was also put into use.

The result

The law firm is now a frontrunner in law firm digitisation, having long reached its goals in this area. “The workflows have become extremely efficient, data protection is guaranteed, the thick client files have vanished and we save €10,000 each year on post and telecommunications,” says Streibhardt with a smile. The law firm was also able to save on personnel resources, which involves an additional significant costs savings. Streibhardt particularly appreciates that he always works with the same contact persons from the TA Triumph-Adler team. **“The speed and level of reliability at TA Triumph-Adler are really ideal.”**

- Employees: 7
- Solution: TA ScanPack for Legal, TA Fax-Server powered by IPTAM, TA Cockpit®
- Customer since: 2009

ETL-Rechtsanwälte, a network of 200 lawyers across Germany, offers legal expertise in a total of 30 areas of law. The seven employees based at the site in Gera specialise in traffic law.
