

A partner who doesn’t let you down.

P-4532 MFP · P-4539 MFP

Working with a reliable partner is always advantageous. And that’s exactly the kind of partner you get with the new P-4532 MFP and P-4539 MFP b/w laser multifunctionals. They power through your daily print and scan jobs quickly and without complaint at a brisk 45 A4 pages per minute with a print resolution of up to 1,200 x 1,200 dpi. And the P-4539 MFP is perfect for those who want to keep their fax system. This model features an integrated fax card, which enables you to do things such as forward incoming faxes to your e-mail account – an asset for any team.

What you can expect:

QUIET WORKER: Despite printing and copying at an impressive rate of 45 A4 pages per minute and scanning at 60 images per minute, the P-4532 MFP and P-4539 MFP are amazingly quiet; they can be set to ‘quiet mode’ to ensure that they work at a whisper-quiet volume whenever necessary. This can be a real relief for your ears and your nerves when things get hectic in the office!

BUILT FOR PRACTICALITY: With the ‘ID Card Copy’ function, you can copy double-sided, small-format master documents that will subsequently be combined onto one page and printed, with incredible ease. All of this saves valuable time and paper.

WELL-EQUIPPED: You can flexibly modify both the P-4532 MFP and the P-4539 MFP as needed, for example, with up to four additional 500-sheet universal cassettes to give you a total available paper capacity of 2,600 sheets. This way you can quickly work through extensive jobs on your own using various media. The optional hard drives, with up to 512 GB, and the 5 GHz wireless card make these systems true professionals that will quickly become indispensable and reliable partners in your everyday office work.

RELIABLY SECURE: The Secure Boot procedure, when the system is starting, and the Run-Time Integrity Check, when the system is running, ensure that authorised firmware is being used. This combination translates to effective protection for your valuable, confidential data; and so does the integrated Data Security Kit, which meets the applicable ISO requirements. Contactless authorisation using the USB card reader* and chip-card or transponder rounds off the package.
