

Increase the quality of your printouts

P-C3563DN · P-C4063DN · P458ci

Discover the world of efficient, high-quality colour printing with our new P-C3563DN, P-C4063DN and P458ci A4 colour laser printers. With a maximum print resolution of 1,200 x 1,200 dpi, the new toner technology delivers a print quality that is more vibrant and more detailed. In addition to the enhanced output speed of 35 to 45 A4 pages/minute in colour, there was a focus during the development phase on designing the systems to be slim and compact so that they can be seamlessly integrated into the work environment. Numerous security features that protect your data at all times rounds off the comprehensive printer package.

What you can expect:

A DYNAMIC PACKAGE: The new generation of colour printers has been updated to reduce the amount of space they need and the number of formats they support (A6R-A4). Even thick paper, with weights of up to 220 g/m², and small-format documents such as prescriptions can be easily printed on the long or short edge in A5 format. The printers can also easily handle labels, envelopes or recycled paper. They feature a maximum paper capacity of either 2,300 or 2,850 sheets, meaning you don't have to spend your time adding paper.

VIBRANT: To further optimize print quality, the color printers use a wax-based toner that produces more vivid and glossy images. Integrated toner locking** also prevents premature replacement of the toner cartridge, helping to ensure that the available toner is used as fully as possible and unnecessary cartridge changes are avoided.

SIMPLY INGENIOUS: The HyPAS™ interface* that has been integrated into a printer for the first time makes it incredibly easy to add software solutions such as follow-me printing or Cloud Print to your system according to your requirements. The free Mobile Print App is available for mobile printing, while Apple AirPrint* and optional Wi-Fi integration are also supported. The LCD display*, which can be tilted by 90 degrees, and 4.3-inch touch panel** make sure you always have a full overview.

THOROUGHLY PROTECTED: Data security is essential in the modern office of today. Whether you are talking about secure, contactless authentication via the optional card reader and chip on the system or compliance with new security protocols (such as TLS 1.3) during data transfers, you and your data are on the absolute safe side with our new high-performance printers. In addition, the integrated Data Security Kit guarantees that data on your hard drive can be permanently erased and overwritten in accordance with international security standards.
